Takeshi Kuroda

These are agreements for equal opportunity. As we may be clear, equal opportunity is promised for serving similar environments based on dreams.

A new world with a new agreement that coming future gives new possibilities as we are forwarding to participate in the universe. If we ask for rejection, the world must be occupied.

These are all new creations of equal opportunity and environments. We may be forced to seek reality by all agreements.

If all women have a dream, we must serve equal opportunity and environment.

All these require new agreements in the world. The world is not limited to progressed nations but all developing countries.

As from all ideas from our office, there we are asking for agreement of the world.

Since the agreement gives and promises all reality to the future.

The creation of the new world is a challenge. But we must challenge the future.

Create the future is a word from our office. We indeed propose a new world.

Suppose we share the coming future as all growth of the new world we see today. How may we find any hope for the future?

Politics may determine the world. That is the right attitude in politics.
