

As a reality of the unification of Asia

Kuroda International Consulting

Takeshi Kuroda

To face all the world's reality, we could base on the unification of Asia. We could go forward to our future then.

We need to calculate how we stand against any reality we have today in the world. And then we see Western Camp and Israel. They have a world and are trying to make them more perfect in plans.

We have to decide the full-scale war. And we may ask for all decisions from the universe.

Then, we could make all the arguments in the United Nations. It could be an open conference to show and ask for all decisions from the world.

We may ask for a vote in the United Nations. In September, we have the United Nations General Assembly.

We can disclose any information in front of any audience in the world.

There must be an only opportunity we have for the future. That causes us to make a decision.

We could prepare any military to face an opportunity. We are trying to decide the world.

We may not find a result, but we have a worth trying.

The ace of spades is always the last one.
