

Asia 2030

KURODA International Consulting

Takeshi Kuroda

Link with all core capitals under a new transportation system and communication infrastructure, we are trying to build a future in new Asia.

We have all new technology and systems that permit the future. Industry in self-capital realizes the development of self-industry along with new infrastructure development.

Any social environment must be developed under society 5.0, and shifting to a new transportation system and communication infrastructure gives realization of the future.

These are under the complete agreement of all representatives of the whole of Asia to rebuild the region.

We seek a new society as all new educational systems, and social systems must give all progress of living environment.

A declared new age of space participation must work for the world under the full cooperation of the region.

These are with national plans from all regions of the whole of Asia. And we may unify the area under the new cooperation.

We are asking for the progress of academics on any bases of new reality creation. We must know that we are trying to build a new civilization.

As we find that under the region's independence, we equally stand against the world and ask for foreign affairs.

A new technological reality is all we are facing today. We are making recent decisions and offering a new world.
