

Asia Vision

November 10th, 2023

Kuroda International Consulting

Takeshi Kuroda

I shall propose that a new social arrangement in American and European society and living standards requires the construction of infrastructure and social systems to be restructured using cutting-edge technology and as an agreement among Asia to participate in a new future.

And we take all duty for everyone to be served equal life conditions. We are trying to recreate all regions under the new technologies.

These are under all new political consensus to unify regions.

The future is only under all our decisions. Who has a decision? Kings.

We have a choice to make all our realities.

We need our necessities for the future. We need a righteous decision to recreate all the reality we have.

A unified view in Asia can propose an equal self-presence in the world.

Asia may insist on a new world against any plans the world has itself. We may have a right to ask for our world.

Under the region's unification, we need our vision to seek our future. A detailed plan is a promise we may find our future.

We could ask for all new concerns with the world as we need to pay equal responsibility to the world. This is an idea that we are trying to share any realities.

Politics always leads to realities in the future. We need all its environment for plan and calculations since we are trying to recreate the future.
