

## Asia declaration

February 18<sup>th</sup>, 2024

KURODA International Consulting

Takeshi Kuroda

The proposal as a unified view of Asia will realize a new form of self-participation in the international community.

Humanity's noble mission proposes a new world without suffering. This is a declaration of participation in a new future in which all humankind will be guaranteed a primary livelihood.

An agreement to abolish war will bring about a new world unity. As members of the universe, the declaration of full participation in the universe means that we share the potential of humanity's future.

We would propose new cooperation with any nation so that the world shares the same ideals and the future.

We have all new possibilities under new technology. We dare to build a new world under our decisions.

We could use a new world system and framework to have the same future.

We are asking for the participation of all human resources to decide the world and redesign the world and the future.

As we are trying to reach an agreement with the world, we all need our decisions for the world that we are forcing you all.

We need to find our hope in the future. That may not differ from what we are proposing to you all.

We ask for all your decisions in the future. And we know you have your decision.
