To gather all the ideals and talents of the region and ask for our reality under its unification of the area.

To fully contact the universe and realize new realities through all its technology and new systems.

Any agreement of a region is all its reality, and it must be shared with all its people in the area with equal opportunity to make them in any reality and the future.

Any industry and military, as well as its politics, cooperate and create new infrastructures to make all of society anew.

We participate in the world with our new responsibilities, and we need our world vision and proposals to share the world itself.

All politics lead to reality and the future. In the region, we need to agree and reach a consensus with the world and its areas.

Politics takes full responsibility for all peoples of the region. This agreement and consensus promise equal opportunity and a livelihood environment for everyone in an area. We share any agreement to recreate any realities in a region.

Under all its presence in the world, we recreate any relationship with any nation of the world under the new diplomacy.

We must consider new social and regional systems to build on the future and any use of any progress.

Only politics may realize them in the future, and it is based on the agreement of all representatives of the regions.
