

Asian Union

KURODA International Consulting

Takeshi Kuroda

We take over AIIB and make unification of the region. We have a presence and can send our own opinions to the world society.

We are trying to unify any standard of economy and military, even with space technology and social norms, with the coming society 5.0.

These are the agreements of all representatives of the region. And we would share the same vision of the world as the future.

Consensus could be shared with a new society with new technology and systems. And full participation to put us into the universe with further contact with them.

We need its bases of alliance with the universe. That gives us all new technologies for the use of space and the military as we may try to build contemporary societies and livelihoods.

Then, we could ask for our presence in the world. We are trying to reconstruct any realities under new technologies.

As we rebuild our industries. Even we see new life and any field of all realities.

Under any circumstances, we decide to protect and rebuild our realities. That converges to the Asian Union.

We can ask for foreign affairs in any world region with all the above. Then, we may circulate the reality we could expect in the future.

There is World War 3rd. We have to stand equally to any realities of the world.

We have a choice. That means we need to take action.
