

Asian declaration

November 4th, 2023

Kuroda International Consulting

Takeshi Kuroda

Submitting a declaration of Asian unity is a proposal for a new world. These present a new world choice to the reality that the world has in the ideals and reality of humanity.

We will agree in Asia to abolish war and propose it to the world.

Cooperation for a shared future for humanity also proposes reform of the United Nations functions as well as the establishment of a one-world government.

The eradication of poverty and creating a world with zero environmental impact requires urgent global agreement.

The reduction of military and nuclear forces in the world, along with that agreement, declares full participation in space and proposes a transformation into a space agency.

We may agree on the world with a new hope. These are our decisions that we deny more tears in the future.

All these are holy declarations from Asia to even with the whole universe.

All these are based upon the agreement of any representative of the whole of Asia. And we are trying to unify the regions.

As we declare, we may not see any conflict but new cooperation in the future.

We all know we have a reality with a truth. But we could make any proposal under the new actions.

Peace is any basis where we can find hope and the future. As we see, the world could seek a new consensus to build a new future. We are trying to offer the world with its basis.
