

Asian union

February 14th, 2025

Kuroda International Consulting LLC

Takeshi Kuroda

The world is only forwarded by any decision we find with all Information on Davos' choices in the media. But not with any control of media by Langley.

Under all these circumstances, to have our position, we propose the Asian Union for any cooperation of the region.

Under new developments, regions may share the same standards and seek to build the next society. We fully cooperate with the developing domestic industry on securities.

As we make its union, we try to make military cooperation like NATO.

And we make unification of its development of space technologies.

Compared to the Western world, life and society standards are equally placed.

New technology gives a region a new civilization that must be based on its own identity and background.

By recruiting excellent bureaucrats and human resources from around the region, regional redevelopment will be standardized according to next-generation standards.

And these are given under the complete agreement of all representatives of nations.

The best educational and social environments will be proposed by consensus among all participating nations, and every child will have free access to them.

Under all its unification, we shall ask for our new presence in the world and new dialogue.

Unified diplomacy creates a new reality for all nations participating in this union.
