

Bases with all new reality to reconstruct nation and politics

KURODA International

Takeshi Kuroda

There is a revolutionary change with all reality in the world today. We need all participation to same reality of the world.

These are required with agreement of Society 5.0. These standards are agreement by construction all reality and infrastructures.

As needed by own industry by planed by politics. All these revolutions are creating new lives and societies.

National decision is by new foreign affair and construction of army and space technologies.

And new educational system could give new national environment to all field.

These are new political decision and construction new national realities.

Everything is possibly given by politics. That is with new environment of politics with all new technology and systems.

Academical progress is all same progress of nations. So, need to prepare all environments.

Basic income may be a base of all new social systems and lives.

These reconstruction of nation and society require with 2.0 of birth rate and comfortability of lives with all new technologies.

IOT systems must be built by own industry and political all reality to take the initiative for all national reality.

These declare is own participation to own futures of nation.
