

CIA and the world. And we have to know this is the only reality of the world.

Kuroda International Consulting

Takeshi Kuroda

Ape may not be a king but a CIA chief. And we have to know the world since this is our only permission.

Any progress in the world that we find in the CIA. That is all we insist on with all the above. We have to see the world and reality that we propose. Politics must act under all these standards.

Intelligence controls the world as any progress of reality you may find above the title. Media control and what they follow are all from the CIA office. This is a result of the progress of all intelligence, even from all history. That is why, as we yelled, we must put ourselves into reality.

And how we could find a world design. That is what we have to know.

But we can not follow the idea, but only with reality itself. That gives us only permission to create the world.

These are the difference between idealists to realists. That means we may not follow the dream. As we find, all these dreams are from the CIA office.

Instead of all these realities, we are proposing new world systems. Ensuring the future is the duty that we are working for.

Reality is compensation for responsibility. We have to pay a new obligation to the world.

The new world system is under a new world vision as we try to be in touch with the world from our office.

Determining of mind could give a t courage to the world. That may create the world as you could ask for your decisions.
