Kuroda International Consulting

Takeshi Kuroda

To disclose any information, build justice, and gather any reality worldwide. Secret police must ask for world revolution, and the military must stand by with a tail of any nuclear weapon.

And there are all the universe's decisions, and then we try to cooperate to work for the world.

In proposing holding a United Nations Security Council and an extraordinary United Nations General Assembly, we propose, with all truth, by majority vote, the establishment of a one-world government.

All these are the bases on which we could stand against all coming wars in the Far East.

We could expand all our groups to share the same world and the future.

We, Kuroda International Consulting, send all our proposals to you. That must be any gift to you from us.
