

Choosing to Comply and Taking Japan

Kuroda International Consulting

Takeshi Kuroda

In world war 2nd, Japan could not stand all unfairness and invasion, and they lost its result as Ukraine could not obey. But to be wise, to obey is the correct choice to seek the future. This is to accept all requests.

And if Japan stands by our side, The loss of all US military bases and the formation of a war situation in the Pacific will completely transform military deployment. These, along with all the secret police work, can explore new world affairs.

At this point, Asian unity gives a choice to the world to deal with the reality of their enemy Russia.

At this time, presenting a new world vision to the world and seeking to construct a reality, it is possible that we will have a global presence with the truth exposed as they turn against their enemy, Russia.

These new realities can make further actions possible.

In these, when we bring justice to the world, the public is given that choice.

In these cases, the opening of truth and dialogue to the world through the United Nations General Assembly can enable public choice and the construction of new realities.

These are the efforts we are trying to ask for a new world.
