Collapse of China

Kuroda International

Takeshi Kuroda

All social bases and life may be on the same fundamentals. As we see in Shanghai, this shows their failure of political actions.

They had had the same reality within their history, but this is a failure of their politics to be wise to know.

Politics must serve the people. This is a political science from the west.

End of their history that they must face all its tragedies.

The last emperor must be dead.

But the time has come. We may not ask the choice.

The last waltz of the tyrant is a final dance of their history.

How could we face their people? To see only with all its tragedy but nothing.

This is proof of the laziness of their politics. That means they may not ask for victory.

Since justice must cover the world.
