

Collapse of Russia

KURODA International

Takeshi Kuroda

At a time king lost everything. The severity is always with reality but dreams.

People left, and the economy collapsed, which we may know was the only failure of realities. What remains is western justice.

They must be called satan in history. The world is covered with revolution by people. And victory must be more than any admired, and we find heroes.

Society and industry as an army must face equal realities. This is all reason they failed.

These are bases with all effort of politics. How the king is denounced is a tragedy. On the other hand, there is a birth of heroes.

Western camp with NATO and ANKUS take over the world. Russian peoples celebrate their justice.

To be wise, all revolutionary change is the same as these. As more to be smart, this is all works of the CIA.

Starting from WW2 that we are the same reality we are living. They finally decide on the final war.

This is a reality today. Above we only ask for steps.
