

## Consideration for Illuminati

KURODA International Consulting

Takeshi Kuroda

Facing their plans, we could expect resistance. That may not be an illusion because they must ask for their survival. And above the universe, any contact and action may not be denied.

They spend themselves in all criminal matters. It must be a weak point they have to conquer themselves.

But they cover the world totally, so they may not know how to fail themselves.

The biggest concern is from the universe. All alien have their decision that is a reason. They could ask for their plans.

They are given a dangerous reality when all their information is exposed. Therefore, it is possible to seek negotiations in these matters. These must be done against the backdrop of all military forces.

For all it's remaining, we may ask for any contact with the universe and seek any settlement of all realities.

All these seek to build a world based on consensus behind the scenes in collaboration with outer space.

If we could build cooperation, we do not need to seek wars.

These are things that ask the self for bargaining in the limit. It calls for negotiations with a view to the use of all space and nuclear weapons.
