

Consideration of the People's Republic of China

Kuroda International

Takeshi Kuroda

History has its ups and downs, and knowing history gives the future. Obtaining the utmost, its rise and fall has a sake pond meat forest.

The reality does not seek illusions and continues to this day. Today, the army and industry confront the world through the Chinese idea that is their bases.

Righteousness does not seek falsehood, and hypocrisy makes oneself an illusion before glory in reality.

This is the permanence of the nation. Wisdom learns from history.

In the world, the West has a king in its justice and possession. The lord of the Orient seeks the final battle in the essence of China, which is Chinese and not the childishness of Japan's World War II.

This is a battle between the rise and fall of civilization and the rise and fall of a great power for eternity.

This is because the wise man is superior to the world and has the world. This is the truth of the Jewish people.

These have World War III in the New World Order and the transition to World Government in the United Nations.

This is the final war between the West and the East, and the plan cannot be denied as a planes

Righteousness covers the world, and selfishness loses the world.
