

Considering the World in the Reality of Willingness

KURODA International Consulting

Takeshi Kuroda

What is occurring in change with the USA is that we find all their new dreams in the future. May it be all their dream and future that they dare to put themselves into.

These are the proof of willingness at all bases we find a future.

On the other hand, there is a reality that people are exploited by themselves in authoritarian states. Both have different futures.

This must be a means of freedom.

The aspiration of business in China's monetary system is also willing. But judging from the correct world and sanity, it is possible to consider the right reality.

All these show that willingness comes from the right decision in reality. We can see that The health of society gives the formation of the right will.

On the other hand, there is a source of motivation called competition. Competition creates dichotomy and conflict.

I propose that proper willingness is from dreams or ideals. That could show them an adequate society on the vase of proper understanding.

All these constructions of understanding and explanation have a tip to creating a decent society and livelihood.

We must see the willingness of any sources to step into the future. So any political actions and decision, as we see in history, is judged under all these points of view,

As we could ask the question of how all children could be given self in reality.
