

Cost efficiency and a new standard for manufacturer

KURODA International Consulting

Takeshi Kuroda

All different parts require quality measures. Above, we may ask for price and quantity. Today new production systems could offer new standards.

We could offer the product with the lowest price and the highest quality. How does the market react to it?

Progress the production has existed from the past to today. That means under all considering we could find a variety of possibilities.

Under all demand and use in the micro economy, we can find a different possibility.

All different demands could give us a decision. We have to aim for a market in all these differences.

Cost efficiency is equal to its acceptance of the market. Systematized and simplified could show a new efficiency by its cost environment.

We have to know as a new production environment as industry 4.0 need its fundamentals on its bases.

We may expand all its vision to global markets and must find the right reality in business.

If we could build core competence in the global market, all new profit rates could ask for the progress of its business. This is from marketing efforts. We need proper action by marketing and a corporate plan that visualizes them.
