

Creation of a new national design in the bureaucracy.

October 25th,2023

KURODA International Consulting

Takeshi Kuroda

We are in a change of the world and the reality. So we have all the necessities to make a new design for our nation.

All new technology and systems are based on academics to recreate all society, administration, and political bases. It is totally different from history's existence to a new future, which means we are trying to make a future.

Education and life could based on a new society that requires the self with a new design. And all wisdom is asked by bureaucracy.

Politics makes a decision, and bureaucracy makes a map and design.

Life and society are bases, and we have all new progress with technology, systems, and academics. They all have use for a reality to recreate themselves.

And all diplomacy and economy are needed by new design to improve and make all changes. Skill and ability of human sources may give us the future.

History is changed from the power to the brain. We have an age of new wisdom. That means we have to ask for all creation using new academics.

One thing from us to you all that, as I mentioned, any descriptions on this Web site. You may ask for all references and ask for all cooperation with bureaucracy to recreate the society, nation, and life. We have a new age based on all its history, and we have a change in society and life. These are the latest technological civilizations from the age of survival. All these are the excitement of the moment we have today.

As in any history, all challengers are trying to struggle against existence but dreams and a new future.
