

Creation of the new civilization

March 20<sup>th</sup>, 2024

Kuroda International Consulting

Takeshi Kuroda

This is what the USA is doing by now. We do not need any of the past but the new future.

We have all new technology and valuable systems to recreate any reality. The USA has its dream to build its world under its dreams and ideals.

Technology and systems have new possibilities to make the world new.

All these are based upon any progress in academics. So we need to make it an environment to seek for the future.

These are the computer generation and a new society under the measure of society 5.0 and intelligent city.

Politics must determine themselves to leave any reality of the past but the future.

And we have all new steps into the universe. We have reached the future from any moment of the past. That means we have all new dreams.

This forces us to take new political actions. That is the recreation of the new world.

We need our plan to make our nation anew. And without any doubt, these are the choices called the future.

We need to find all our purpose in the world. That is the proper duty of any politician.

That means I am insisting all children must be served its dreams in their future.

We have the right vision to recreate the world. Then we need all our new actions.
