

Crisis of the world

March 18th, 2024

Kuroda International Consulting

Takeshi Kuroda

The world is divided under different justice and visions. But the presence of the Western camp is the core of our reality in the world.

All new conflicts appear. These are rebellions against the world in third countries.

The absolute superiority of the Western camp cannot be denied. You must understand that this is the only correct understanding of reality.

We could wonder if all these make different justice that is the New World Order and against it.

As we may reach the idea that must be Armageddon.

On these terms, the world must be divided into two differences, But we must insist on our world with our world vision.

As far as we can cooperate and share equal benefits, we can find all our realities in the world.

The plan of splitting the world into three territories is the right choice for us to own the world.

We must possess our realities to face all coming changes. But if goodness and evils ask for conflict and battles, we could take a full distance from them and may seek our realities.

Wise always takes a world. This is an absolute commandment.

The unification of Asia may stay away from all these conflicts and share all my visions to ask for the new world.

And you have to remember what I said. Wise always takes the world.
