

Dialogue and realization

March 10<sup>th</sup>, 2025

KURODA International Consulting LLC

Takeshi Kuroda

Even as discussed at the Davos conference, dialogue may give way to reality. Conscience might be a decision made in any opportunity to the reality of our world.

Dialogue may be only the way which give us any reality in the future. And we can argue all the new designs of the world.

And we may realize all its agreement by the world which must contain with any ideals and hopes of all ours.

We, Kuroda International Consulting LLC, are seeking any solution to all reality of the world under new ideas that we have considered.

Delighted ideas may be accepted even under any reality that contains the world itself.

For all new priorities of reality, we are facing new eras to make all our steps into the universe and new contact with them.

We have a new opportunity right in front of us all, and new competition rules may ask for Chaos in the world.

But if there is competition, we may not lose all these games with the world. We can find all new technologies today. A new society under reconstruction of itself under the new measure called the next society may possibly provide a transition to new abundance.

The military is a decision, but justice may cause against it under new dialogues to all conscience of the world.

Additionally, we are trying not to be away from its decisions under all militaries. Still more, we are seeking new technological civilization under a new dialogue with the world. We shall offer new world principles from our office to the world.
