

Double standard

Kuroda International

Takeshi Kuroda

Politics has a double standard in any nation. That truth shows all reality and the validity of the world.

All reality of the world that we only are permitted to participate in all reality.

These are all tails of reality, even in Ukraine. Politics must only be with and handled by those.

Due to asking any reality to make under and by them. In the tail, we have the truth. That is what we have to work for.

That proves that in the tail, there permit any conversations. That we may try to seek any realities.

A remark that all these realities have complete contact and contract with the universe.

We may seek our vision under the construction of plans.

There we may ask all deal under behind that decide the world.

How we may offer benefits for each and these deals are all bases we may ask our futures.
