Takeshi Kuroda

1. Outlaw all war
2. World Disarmament Conference
3. Building consensus for participation in space
4. Agreement on unified management of the world
5. Agreement on the ideal of a world free of suffering

These are proposed items for the General Assembly, requiring consensus and decision by majority vote.

The Agreement and Cooperation for a New World and Future also proposes shared ideals and goals for all nations in the new world reality.

New participation in space requires cooperation and consensus building with the diverse beings in space. Rather than leaving it to the UN Security Council, we would like to propose shared principles and agreements among all nations regarding space.
