

Eliminate the American presence in the Far East and propose an independent agreement and peace-building.

April 20<sup>th</sup>, 2024

Takeshi Kuroda

The construction of peace must be in agreement with all nations of the Far East, and we try to make its governance to make it independent of the regions.

We share any responsibility in the region and eliminate the American presence in the Far East. But on the other hand, we need to take responsibility for the world.

We must make peace in a region under the agreement and our efforts. It may not be from any direction of war from the USA.

And any possibility we could share is all we have to rebuild any reality and rules in a region.

All of us have the same responsibility to make our presence in the world. At this moment, we have to know we are not following any racism.

All these cause new regional cooperation, and we all have the same roots called the East.

We may guess that there are conversations with The East and The West,

Eliminating all wars from the Far East, making them illegal, and declaring peace-building can propose new changes to the world.

As we insist, any declarations from our office may be in touch with any reality of the regions.

We are trying to take equal steps in the world and the future.

If we are not trying to cause wars, all these ideas will make it possible to share new cooperation with the world.

From the East's deepest loves to the West.
