

End of the power game

September 9th, 2024

KURODA International Consulting

Takeshi Kuroda

The power game must be ended by its power. This is all the proposal for World War 3.

We dare to seek all its last game under the prize of all our death. And we are trying to move forward to victory.

We must complete the calculation of any reality using strategy and cooperation with the universe.

Under all these, we need to see how the world is governed. Then, we make all our decisions and seek wars.

Under all these circumstances, we must be wise and ask for new diplomacy.

We also need our world vision to gather our reality. The United Nations General Assembly is all ready for our discussion and any disclosures.

On the other hand, we are trying to make world revolutions under any effort of all secret police.

Wars must end any history of the wars on this planet.

And we need to know these are not suicide attacks, but we have our possibility of victory.

On the third hand, we may try any negotiations. Peace is any result. We conquer any confusion.

This is a way and decision of all ours to reach any dream of ours.

Politics may follow my steps into their futures since King has always made his decisions.
