

Facing Pax Americana

Kuroda International Foundation

Takeshi Kuroda

Waiting for a new age in America, we face all these realities equally. Their style of life and technology must cover the world. These are rightly called Pax Americana.

They are willing to own the world. They are wise, and they have a strategy. These are the same as CIA techniques.

A mega presence that we see in reality is truth. They are the winner of these power games.

They have a dream for the universe, as we see in Hollywood. And they have had contact with universe since World War 2nd. This must be the last learning that They have a connection with a grope of Aliens.

Group of Alien has a porpoise. And we have a tail of the world may be called New world order. There we have to see any concerns.

We have a Matrix that is no doubt in control of the world.

So we Kuroda International insist 3rd choice from all these realities.

We are leaving from confusion and seeking our own reality as the future.

But we have to catch all truth under our circulation to seek our own steps.

We are not trying to follow America but our future to go.
