We need to face only a truth that is called reality. That is the only permission we can work for. That must be all failures of Chinese diplomacy. From the beginning, all reality is known by the world. That is who doesn't that is who did not know the world.

Anglo-Saxon mission is all reality of the world. That gives us all explanations for the failure.

To face all these, only permission is called consequences.

The world is given in battle, and the outcome is reality. In these, the reality of the West exists. That is the reality of living, and mutual benefit is the only common rule. That is the correct attitude and understanding of politics.

Politics may not seek the ideal but the reality.

And then, we have all the calculations for reality and do an action. That is a way to realize any ideas of self.

And we see information must be any basis we could work for the world. And reorganize any reality of politics to make it a reality for the future. We need to know Washington D.C. for any reference of all ours.

Since the political environment creates any reality, we could seek the future, so this is a wise decision and idea.

As you see, Kuroda International's concept is to create the future. We are trying to create the future then.

Being Wise without any failure means failure comes from a lack of wisdom. So academics may be any basis we could on ourselves. These are the modernization of the Western camp that we need to own ourselves.
