

Falling of world order

KURODA International Consulting

Takeshi Kuroda

U.S. unilateralism, the corona crisis, and Russia's invasion of Ukraine have destroyed the existing world order. These are the realities of a new world where nations are threatened with aggression or attack.

We still may not find new world order even if we have a plan identical to what it is.

Next is all the surroundings of the People's republic of China. Western camps need a new enemy.

All these give us to imagine Armageddon. But we can not find who comes to be evil.

All media must yell inhuman nation as China is evil. All these realities come as same as all it was. But they have their tail called Illuminati as CIA media control.

We may remark that to reach an idea. Military and economy give a use for reconstruction of order. There is a power game that we have to spend ourselves in.

We need a new philosophy to settle all realities. That comes to know we need progress and use of all academics.

These are part of the idea that we are trying to seek a new world.

Rules and laws must be shared under equal participation.

We have all new technology that has full of use for life and society. Even the new space age is a reality we can work for in the future.

What can we do if we share hope with the world and the future?

Politics and bureaucrats could design and plan the world we are trying to cooperate with.
