

Fateful day

February 16th, 2024

KURODA International Consulting

Takeshi Kuroda

All reality will be decided at the United Nations General Assembly, which will be held on the 23rd. These proposals propose the determination of the world and the construction of the future through a majority vote.

This proposal proposes world unification and the abolition of war in the world and requires a majority vote.

We are trying to take the majority of the votes and make an entire decision for the world.

And we must propose a new world vision of its future. We need all the details of the vision to make any agreement with the world.

These are the agreements under the conscience of the world.

All these are based on all agreements of world leaders. To share the world and the future that we propose.

We want to share the truth and propose decisions for the world in the open forum of the United Nations General Assembly.

We propose a new world vision to any nation to ask for their acceptance to realize it in the future.

And all these are facing a new contact with the universe. We could show all its information to all nations.

The future is under the vote. We are sending a new world.
