

Final decision

January 23rd, 2024

KURODA International Consulting

Takeshi Kuroda

The world could be created under any decision against any plan. To expand justice and try to gather the whole world with any forces we can attempt.

Reality is the only permission we can seek for the world. And we need a proper calculation with the world to ask for any decision in the future.

The final decision is a decision to the future, and it is only permitted once in history. Only the king is allowed to seek the world.

These are the responsibilities we can find in the world even if we know all the reality of the world.

Any forces are the only permission to make any reality in the world. We need to stand against the world under its forces.

Then we have a decision for the world. We could send our world visions.

And we have to see we are standing in the final moment of the world. So the decision is totally required by the world.

We could be beside any decision of the universe. And they have their decision.

The power game is a law of the world, so we are trying to participate in all realities.

To gather the world, we need to raise vision and ideas. Then, we may find a possibility with a world to ask for steps into the future.

To make an opportunity, the need to take actions and decisions is a direction to the different futures.
