

KURIDA INTERNATIONAL

Following generation and new technologies, and the way of the nation with its reality

KURODA International Consulting

Takeshi Kuroda

The world goes to the future. We find all new technology in reality.

In history, we found all wars. We have a difference in all technology today. The nation has itself from a base to the top. The country contains itself with any reality of theirs.

We may expect and wonder about the future as we find all technology. Society and livelihood show all truth of the country.

How could we face all new technologies and a free economic system that may seek an all-new reality through his product and service?

We need a plan for the future. The proper construction of the nation is permitted in the future.

Military and space technology may be wondered his future. That means we are facing Holly Wood.

Under all these points of view, what can we find in the world reality of its power game?

Western camp shows their priority and superiority. We need at least as same as they are. This must be an agreement of Asian unification.

Then we could offer equal partnership. Power games only permit power games themselves.

These are the new reality of the west and the east.

We must prepare for the future as we propose a new vision.
