

For all duty that to serve lives to all peoples by politics

KURODA International

Takeshi Kuroda

To see that all people ask for lives and futures is possible under politics.

The world may ask its duty for people. That is a habit of politics.

There will be new technology and civilization participating in space ages in the future. Those are the reality we have.

There are all socially vulnerable and poor determined by politics that are equally living environment and social agreement as forwarding to the future.

Basic income could ask new social system as controlled by an IT system that asks duty of labor.

Dreams are all people besides its dream and have a hope to futures. As academic progress solve all pain and suffering.

That the world could ask agreement by. And unification of the world under hope and ideals.

That means we are trying to be a challenge as frontier spirit as the USA. Braves are not away from the future.
