

For an opportunity for trade agreements

Kuroda International Foundation

Takeshi Kuroda

All divorce and new world separation are given under the trade agreement. Whole Asia has a massive economy with its technologies. Under the all-new group, we are asking for its presence in the new world.

There is one with the Western world, and we may seek the others with us. The market must be closed. That is our decision to stand against the world.

Expand with all reality to United Nations that many nations are equal participation against justice. We may consider that world society with us out of criminal matter may not be rejected.

In this equal position, we may propose our vision to the world. They have a new world order, but we may seek a different one.

These are a reconstruction of the world, and we are equally facing reality as it is called the new world order.

Under this reality unification of Asia must be completed and asking its presence in the world.

We are prepared to face the coming future and make all plans to be realized in the future.
