

For and against the reality of the world

February 3<sup>rd</sup>, 2025 KURODA International Consulting LLC Takeshi Kuroda

If we take a vote to any representatives of all nations, how could we find its votes? We have zero votes with us, but the reality of the world itself.

So these are the challenges to any reality of the world that we are trying to seek for a new world.

And I can be sure that these are the realizations of any possibility that the world will cause the future itself.

I shall raise its ideals and the world's future, which are all our proposals from our office.

A king must have the right attitude to face the world. That means doing the right things.

These are the realities of all politics that need to be learned.

A man against the world, and if he makes a victory against it, the world must obey him.

How must the world decide itself under a new design map of the world from our office? We all have our own decisions.

The world has his decision. Are you against or for the world?

With all the above, we have a new contact with the universe, and they have made all their decisions regarding the earth.

These are our celebration of Independence Day.

We finally find that hope is the only direction we may follow.
