

For the future of all children

June 11th, 2024

KUORDA International Consulting

Takeshi Kuroda

The world must be handed over to all children. And we all have responsibility for all children.

These consensus could change the world as we find all children in Ukraine and the Gaza Strip.

And any politics may take any actions on these. If the world is hopeless, we need to take all responsibility, especially for all children.

We may dream of a future even under our circumstances with the world today. And politics can make them in the world.

Real politicians are more than heroes. We are gifted since he is a hope.

We may remind Mr. John F Kennedy and Ronald Reagan. We have to follow their steps.

We have to ask the right question. Who could give us the future? He is always the hero of the world.

If the world is out of hope, politics must make new promises to everyone. And do realize them all. Since he is a politician.

Only politics can change the world. The secret must be courage. That is only a possibility to open the future.

We have to look around and see all politics. And must find the one.

We will have an independence day since we decided to enter the future.

If we are gifted real politicians, he must give us an answer. And do make them with the future.
