

## Forecast of the world

April 10<sup>th</sup>, 2024

Kuroda International Consulting

Takeshi Kuroda

If the new world order is only a reality we have with a world, any plans may not be denied, but reality we have to face.

There must be any decision of the universe that the Illuminati dislike. And we could see, there must be resistance against them.

They are all in contact with the universe, which has its purpose of working with all space residents.

All changes must occur in all reality. That must be the shift to the new world that we have yet to learn how the world asks for its future.

The economy must be shifted to the new, and all the wars we can imagine could occur.

How could we hold up the world? If all these efforts are lost, the world must fail itself.

We have all kings with a world, and what should their decisions be?

We, Kuroda International, propose a third vision of the world. All these are not the same as two divided worlds.

And we know there is a word called Armageddon. Does it come with a world or not?

There are new world trends that all people follow. These are the new technology and lifestyle trends.

Who knows the future? That we have in our minds.

However, the self's determination and decision have a reality of making new things in the world.
