Takeshi Kuroda

We want to present a unified proposal for all of Asia to the United Nations. These proposals propose an abolition of war in the world and an immediate end to the conflicts in the Gaza Strip and Ukraine.

We have all tragedies with wars in any history and any region. That proposes to us the world without wars.

How could we dream of a world without wars? I know what it is. We need a step forward.

A unified proposal for all of Asia can make this a reality. These can propose a new way of looking at the world to the Western camp.

These also give us a new world vision, and we want to seek consensus from the world.

These also seek a world without pain and suffering. We could share the ideal of humankind with any races and nationalities.

These are all new steps to a new world under all our efforts. There must be one who makes his step first.

These are definitely the right choices that will provide a future for the residents of the Gaza Strip and the people of Ukraine.

We are trying to make our steps with consequences against any world reality.

This must be our proper choice for the world, and we are trying to share all its responsibility with them.

We do not need any tears but a new world.
