

From the history to a recent

Kuroda International Consulting

Takeshi Kuroda

What is in the mind of all people? And what are they asking for their future? We have to know what is the answer from the world.

There are all changes that have occurred with new ages today. But we need to know the future.

If people lose their temper and nerves, They must ask for proof in reality.

This is a requirement of proper education. And its people may ask for their new world.

Any ideas that a people make them idealized. That comes a justice of the world. These are the decisions of the people.

Popularism may seek justice. But under any judgment, righteous action is a way to reach the future. But we may wonder that there is no such thing. But people may have a decision for the world.

All people may admire freedom. No one desires to be enslaved. That is an all reason.

We need a future. A future is all from any decision of self. But all decisions must come from the self. It may not be from the others.

We have a challenge. That is a future creation as any progress could make any realities in the world.

Any emotional mistake may not be a decision of the world. We need all wise to decide the globe.

The righteous decision only permits the future. This is all the duty of politics.
