

KURIDA INTERNATIONAL

Gifts from Santa Claus to people

Kuroda International Consulting

Takeshi Kuroda

The abolition of war on Earth promises enormous expenditures in the dissolution of military armaments and the shift in space technology to the Space Forces in developing new social infrastructure and providing state-of-the-art housing environments for all people.

All these agreements are proposed from our office as gifts to all people.

All these agreements are the bases of the full unification of the world as we have a new era to step forward to the universe.

As we send all letters to you, all ideas are for the future as we may dream of a new world.

We have a reality, but the future may be determined by all new dreams. That means all kings have a decision about the unknown future.

There is all new contact with the universe as we may cooperate with a new world that continuously asks for all futures.

What do you have in your mind to see all eyes of children? You may ask to be a hero. That is more than worth it to the world.

We have all history that all politicians may ask for what? But who only gives us the future is a politician under now system called democracy.

All children may dream of you. That is whom you have to know. It is called a hero.
