

Global race

February 16th, 2025

KURODA International Consulting LLC

Takeshi Kuroda

Global race is all reality we find in the world. And all progress occupies the first presence of reality. We, Kuroda International Consulting, offer any victory against it.

Technology and industry are the basis of reality, and they are all part of any educational environment—education besides life, which is in society.

Politics may raise any goals realized under any plans, and it makes the future.

The global race is measured by the progress of all academics, which can be used in any future reality.

And we may find that the calculation of reality is made by all the progress made by all technologies. They give all progress in any field or country.

Then, we find that the economy follows it, and finance controls everything. Langley makes all the decisions.

Above all, we were first permitted to participate in the Davos conference.

The others are only tools that obey and pay royalty to the world.

So we are trying to make all our independence and stand equally against any reality in the world.

These are all explanations for our consultations. And we dare to make all those with a world.

Finally, we must know that the Western camp is the most popular and has the most votes. Its foundation is humanism, which gives it society.

All these measures eliminate inhumanity, so we need the same reality.
