

Holding the World Conference on Disarmament

KURODA International Consulting

Takeshi Kuroda

An agreement prohibiting the use of war in all real solutions would establish a treaty for the participation of all nations of the world in the drastic reduction of existing military forces and the establishment of a united force in the maintenance of the world.

These are the complete renunciation and prohibition of war against which history is saturated with war.

These are the establishment of the Space Force and the agreement of all nations on Earth's defense.

Reducing all military expenses goes to building new social infrastructure in any region of the world under standardized self.

Under new consensus and agreement, we may find a unification of the world in reality. We could see further cooperation under those realities.

We could agree that even a new world government is based upon any agreement of all nations.

And we have new participation in the whole universe. As we seek any cooperation and even with a new relationship with the universe, we could find a new possibility in any reality.

As we see, we have a new era with unlimited possibilities for the future. That is all remarks we could agree on and share the same realities in the future.

We have a new consensus on the base of the new world. All further cooperation could give us new realities as we reach the future.

We have a new era in that we propose a new world under a new system and consensus. These may not reject any participation of any nation. We should share all opportunities.

We must know that we have a new future under all new possibilities.
