

If the economic blockade is given to China

KURODA International

Takeshi Kuroda

All export must be stopped. Then they have to make their choice.

That means their economy must be stopped. With free camp may ask own market. These are contrasted we may find with a world.

New technologies are creating a new world—all these trends with a free trade system give a new reality.

Blockade separates the reality of the world. West camp must have its choice facing all truth of the world.

There is a presence and justice we are facing equally with a world. How. We could ask choice to the future.

Equal people may ask the world from any place and existence. This is a world called peoples' world. There is movement so as you may find as by the peoples for the people to the peoples.

Let me ask questions for all people who have permission to ask for their dreams. Is this the right world or the world which you dreamed of? We all have a right to seek the world.

These ideas from humanity are justice and the reality of the western camp.

This must be why all nations under inhumanity may not surpass the western camp.

Love is a word we equally share. This is an idea we may seek in the future.
