

If the legitimate victim is the perpetrator

KURODA International Consulting

Takeshi Kuroda

Russia is a slave to fear. You can't go against the strong.

All these are the attitude of the victim. What can we find in the new world if all people are allowed freedom and dream?

True king work for all peoples leaving part of their profit. That causes us to choose the king of the world since we have a hobbit called democracy.

The history of the war must be solved in peace. That is the idea that we need a new world.

If the proper world is the world, all peoples spend themselves on their dream. What can we find in all people of Russia? Are they victims or perpetrators?

Hate should not last forever. The solution should be the future.

Is a Russian soldier victim or perpetrator?

This is a proposal of peace. All agreements could solve the tragedy of Ukraine.

All after the above, we could see true justice. That is what we can work for that.

That is our decision for the future and the world.
