If all these occur, we need to stand with our military at least equally to any forces of the world. These are the results of all diplomacies.

And we need to determine whether to participate in all these wars, asking to seek a victory.

So, we may find that the military, with its technologies, is a decision of all realities. Then, we are permitted to make all its strategies to face any reality we have been given.

We need to cover the world to make all our group of realities. And we may ask for entire-scale wars.

Nuclear and space weapon has their use at this moment and may tails any forces to ask for all battles.

The world must be divided into a few groups, and we must expand all our realities through cooperation through new diplomacies.

As we can see, all these diplomacy will have tails of agreement in World War 3.

These are clearly intended to promote a war footing and to construct a new reality.

These should be lessons from Japan's outbursts during the Second World War. Patience means you should fight the war on your own until the end. Then, we may find new opportunities to make new diplomacies.

Agreement of the peace must exist. And this is an agreement of conscience. We need all dialogue to ask for all reality under the new deal.

Politics may be required to fully engage with the world and seek a new position in International society.
