

In a new matter called space weapon

KURODA International Consulting

Takeshi Kuroda

As we see all power balance in the military map of the world, we find a new matter with space weapons.

In history, since world war 2<sup>nd</sup>, we have a search for space technologies on the earth, and all contact with the universe exists. And we reach a moment of today.

If world war 3<sup>rd</sup> comes, all leading technology and space technology seek them on the battlefield, and the world must be divided into two different of themselves.

And we could find any concerns with any contact and themselves in the universe.

How could we calculate the result? And how do we see the future?

Though we find these are full-scale wars, we must forecast all future reality from all we have today.

Only we can see the future under all circumstances we have in the world.

On the tail, we have all nuclear weapons. How many politicians belong to the Illuminati? All of them. These are the reality we have today.

If we could propose a new world vision instead of the new world order, how do we see any difference in the world?

How could we gather our group of reality in the world? And what could we take any actions against the world?

What is the difference between the two realities? And how could we forecast the new realities? At the last moment, it is an Anglo-Saxon Mission called the new world order, and we have to answer the world.
