

## Information

KURODA International

Takeshi Kuroda

Related to the Ukraine invasion, Mr. Putin is asked himself as Hitler. With the whole Asia ask any contact with Russia and China with coming war by independence.

We shall propose to lease all world information by their secret police and ask themselves to retreat from Ukraine.

They are trapped that what they find by now. They could accept our proposal, and under International society, we could equally and fairly cooperate above all its information disclosure.

It must be all their information that all politicians must be related to.

That means the world faces the new world order of its information for the first time.
