

Invitation to the world conference

KURODA International Consulting

Takeshi Kuroda

Not as the place by United Nations, but gathering any representative of all nations and asking for a world conference.

This causes us all to make decisions about the world and the future as we are trying not to ask for even a rejection of the nation. But all agreement gives a new world.

All these are the decision of the world and the future. That forces us to make an all agreement but no exceptions.

This may be an all decision so we are trying to make all agree and we may select its representee of all realities.

This may be an open conference that all eyes of the world may stare at.

Under the vote, there is a majority to decide all issues we are trying to make a new world.

Each nation is permitted any proposals. And we have an idea that the world's unification requires the complete agreement of any country.

As we may declare full participation to the universe.

As still gathering all kings of any nation, they have a decision of the world.

A complete separation of all civilizations finally reaches its unification.

This end of civilization goes to the beginning of the future.
