

Joining the liberal camp

January 15th, 2024

KURODA International Consulting

Takeshi Kuroda

Liberal camp is sharing its agreement called freedom. These guarantee a future in the freedom of individual existence against authoritarianism.

All these are not under power games but agreement and all tails of bases of self. Diplomacy could agree under any consensus of the nation.

Under any consensus, the world could stand equally to any reality.

We finally find that in the 20th Century, we had a revolution with the USA. And today, it must cover the world.

Liberalism guarantees people a future of autonomous choice.

These are the differences between authoritarianism and the exploitation of people's futures.

And we see all bases of new consensus of the world should cover the whole world, and it must give the future of the earth,

We need all arguments to create the world's future, and it possibly shows us the new world.

We have a choice for change and need all courage for change.

For the sake of all people, politics forced its decision on the world and the future.

We have a way forward, which is called a choice and decision. And we all know who has all those. That is proof we need our freedom.

This is a way of righteous decision to the world. These are the duty of politics.

And the decision gives a world and the future.
